Disease Surveillance Working Group Update

Aims & Objectives

1. To identify and liaise with existing disease surveillance networks
2. To maintain a specialist contact network across FEEVA member states
3. To promote and assist with the establishment of disease surveillance systems in countries where they do not currently exist
4. To identify and promote cooperation / amalgamation opportunities between networks
5. To identify and quantify imminent disease incursion threats.
6. To organise educational conferences and share information with FEEVA membership.

Summary

- Facilitate Cooperation
- Share Information
- Encourage Resource Transfer from Stronger to Developing member states
- Education of Membership
- Prevent / Control Disease Incursion

Education / Information Sharing

- Annual DSWG Conference
